

Background:

3 years ago, Lanikai Juice began its commitment to decrease its impact on the environment and become a more energy efficient Company.

Green Initiatives:

- Completed renovation to all stores, which include recycled koa wood counters, LED lighting and energy efficient air conditioning systems
- These upgrades have saved Lanikai Juice Company 34,134kWh in energy savings, resulting in cost savings of \$8,796 in the past year alone
- Recently purchased a new fuel efficient delivery vehicle which is environmentally friendly and also produces very low emissions and lessens our carbon footprint
- Converted from styrofoam cups and bowls to recycled paper products which includes napkins, cutlery and cups and bowls
- PET bottles have been replaced with glass bottles
- Partnered with Nalo Farms, in its pledge to use locally grown products for its smoothies, bowls and cold pressed juices
- Launched their own reusable mason jars. When a customer buys a mason jar, they are encouraged to reuse their mason jar when they buy smoothies or fruit salads
- Implemented their new recycled paper shopping bags in compliance with the Plastic Bag Ban, which became effective July 1, 2015
