

# TEN ENTRY LEVEL GREEN ACTIONS – FOR HOTELS

## ENERGY CONSERVATION

---

1. Lighting:
  - a. At least 75% of all lamps in building are energy efficient LEDs, CFLs, T-8 or T-5 s with electronic ballasts (not T-12) fluorescents or equivalent energy efficient lighting  
Locations: \_\_\_\_\_
2. Policy and practice of turning off lighting and HVAC in unoccupied space and/or install lighting and HVAC controls in areas such as:
  - a. Occupancy Sensors and/or Room Key cards
  - b. Bypass/delay timers
  - c. Photocells for exterior lighting and/or areas with significant natural daylight
  - d. Timers/sensors for lights on circuit breakers that generally operate only at night
3. Equipment and Appliances:
  - a. Purchase ENERGY STAR equipment and products: Include language in your procurement policy to require ENERGY STAR products when buying new equipment
4. Benchmark using ENERGY STAR Portfolio Manager

## WATER CONSERVATION

---

5. Water efficient fixtures and equipment – such as aerators and pre-rinse spray nozzles
  - a. At least 75% of bathroom and kitchen fixtures are High Efficiency and/or WaterSense
6. Offer linen & towel reuse option for guests
  - a. Signage must be visible in bathroom and/by bed

## SOLID WASTE REDUCTION & RECYCLING

---

7. Water stations: Provide guests with reusable water bottles (through purchase or giveaways with marketing on them) and set up water filling stations
8. Purchase paper products (tissues, toilet paper & office paper) with 50% or higher recycled content
9. Recycle paper, cardboard, metal, glass, plastic throughout the property and provide recycling containers in guest rooms and public areas

## POLLUTION PREVENTION

---

10. At least 50% of janitorial products are certified as environmentally preferable (Safer Choice, Eco-logo, Green Seal)

Property Name: \_\_\_\_\_ Name of Property Representative: \_\_\_\_\_

Phone Number: \_\_\_\_\_ Email: \_\_\_\_\_
