BUILD+BUY GREEN 2022

Honolulu

Background:

For 21 years, the Build + Buy Green Conference has convened industry leaders and green building advocates from across Hawai'i and the greater Pacific region. The 2022 event featured "The Intersection of Climate Action, Equity, and Affordable Housing," focusing on how to further advance LEED, equity and climate responsiveness into affordable and work housing projects.

Highlights:

JTB Electric Bus for Site tours.

Public transportation timetables, maps, and routes were made available to the participants .

The [2022 Build + Buy Green Event](#) at the Entrepreneurs Sandbox is participating as a green event in the Hawaii Green Business Program. To be a green event, the Build + Buy Green was planned with the intent of conserving Hawaii's natural resources by implementing practices that conserve and save water and energy and lower the amount of solid waste generated.

Some of the green measures at the Entrepreneurs Sandbox are the use of ENERGY STAR equipment, LED lighting, and low-flow fixtures. The event will have recycling bins, eco-friendly food service ware, and USGBC will donate excess food from the event to the Next Step shelter. Local food will be served and provided by Roots Café and Touch of Heart.

We ask that you as an attendee take some green actions in support of this event by:

- Bringing reusable water container
- Bringing reusable utensils
- Considering a mode of active transportation (biking, walking, or public transportation)
- Considering carpooling with coworkers or friends

For more information about the Hawaii Green Business Program, see [website](#).
