Honeywell

Background:

Honeywell is a publicly traded company with 97,000 employees in offices around the world. For more than 35 years, the company's Smart Energy business operates in over 130 countries has served 1,000+ utilities globally. They focus on energy-management goals and meeting regulatory requirements through energy efficiency, water efficiency and demand response programs that are powered by industry-leading technology. Smart Energy also provides turnkey program management—from customer recruitment to hardware and software installation—and customer care services that boost participation and program results.

The Honeywell office in Honolulu is committed to helping improve the health and quality of life of the island's citizens, and the sustainability of its community. An essential part of that commitment is to institute operational policies that actively promote clean air, conserve natural resources, and reduce the country's dependence on foreign oil.

Highlights

Recycling and Waste Reduction

Office Supplies:

- The purchase of rubber bands, plastic binders, and plastic office equipment such as file boxes and containers have been eliminated.
- All supply orders are reviewed and checked against existing inventory to avoid repurchase and waste.

Kitchen:

- Replace water bottles with inline filtration system
- Straws, paper, and plastic plates/utensils have been eliminated.
 - Washable plates and utensils are provided.
 - Employees use own refillable water bottles
 - Use recycled paper towels to clean surfaces
 - Employees take home appliances, such as the Keurig machine, to clean/wash

Paper Reduction:

- Paperless interoffice communications
 - Employees use OneNote, OneDrive, and Microsoft Teams for written communication and file sharing
- Paperless presentations and meetings
 - All materials for meetings are projected on a screen in the conference room
- Reuse single-sided saved scrap paper instead of post-its and notebooks
- Most marketing collateral is available online via downloadable forms, fillable PDFs, and work order forms which can all be emailed
- Mailers are designed to require no envelope
- Cloud based technology with external comms
- Optimize all documents that need printing beforehand to reduce margins and pages

Recycling:

- Use 100% recycled paper for minimal printing needs
- Provide recycle bins in the copying and kitchen areas
- Participate in annual e-waste events where electronics are recycled

Energy:

- All devices that don't require electricity are unplugged when not in use such as phone charges, speakers, fans, electronic staplers, and power tools
- Screen savers are turned off and computers are set to sleep while not in use
- All desktop computers are replaced with energy-saving laptops
- Automatic daylight dimmers are installed indoors that turn off lights when there is enough natural light
- Employee's practice water conservation which is encouraged with signage and education

Community Involvement & Special Activities:

- Honeywell drives its' Hawai'i Energy and eScout (Energy Scout) programs to educate and encourage residents of Hawai'i to participate in energy conservation and efficiency programs. Our goal is to help Hawaii residents and businesses to adopt a clean energy lifestyle by providing rebates and other incentives in return.
- Continued work with the Food Bank in our "Rid-A-Fridge" promotion and Bounty Program as was announced in our 2013 Green Business Award submittal.
- Provide Solar Tune-up rebates to enable customers to service their solar systems, so they run properly and reduce dependence on electricity and therefore fossil fuels.
- Honeywell manages the Water Sensible program which motivates residential and commercial account holders of the Honolulu Board of Water Supply to conserve water by offering rebates and incentives on water-efficient devices. The program offers a free portal for customers to track their water use, sign up for leak alerts, and receive personalized recommendations for using water more efficiently.

Train all staff on environmental policy and procedures:

Hawai'i Energy's Energy Efficiency based programs include training and education on environmental policies and procedures including, the proper disposal and recycling of appliances, and commercial and residential lighting.

Educate patrons on your environmental practices:

The program continually shares environmental influence and conservation contributions with call center customers, clients, local businesses, retailers, and associates as part of program outreach initiatives.

Employ local companies when subcontracting labor force:

Hawai'i Energy deploys local subcontractors for most of the labor including field inspections, meter replacement, field repairs, field retrofit work, appliance installation, and electrical and plumbing jobs.

Organize community outreach projects that give back to local communities:

Programs consist of community outreach projects that educate, empower, and equip local communities with the ability to become energy efficient. They have a direct impact on local communities, especially those that are hard to reach, as Hawai'i's primary energy efficiency resource.
